2004 ALISE ANNUAL CONFERENCE

JANUARY 6-9, 2004    SAN DIEGO, CALIFORNIA

# ALISE: Poised to Pounce 2004 San Diego, CA

## Message from President Louise Robbins

Welcome to the 2004 ALISE Conference--POISED TO POUNCE: The Power of Convergence! This conference marks a "coming out party" of sorts, in which we declare that we have arrived at a position from which we, as library and information science educators, can flex our collective muscle and demonstrate the "power of convergence": the power of new configurations and time-tested alliances; of expanded opportunities and familiar (but unfamiliar) jurisdictions; of the sense of place and the reality of being virtual; of the strength of story and the importance of information.

It marks a "coming out" in another way as well. This well-built conference represents the cumulative efforts of a number of hard-working groups: the Conference Program Planning Committee chaired by John Budd and Marie Radford, with juried papers chaired by John Richardson; the Research Committee chaired by Elaine Yontz; and the Awards Committee chaired by Margaret Dalton; as well as the Board of Directors. But their efforts could never have converged into a powerful conference without the excellent work of our new Information International Associates team: Deborah York, Susanne Dupes, and Lance Vowell. We welcome them.

We hope you take advantage of every opportunity this conference affords to learn from each other, make new colleagues and renew old friendships, and find new power in the convergences of the association.

## Message from the Conference Program Planning Committee

The health of any professional association or learned society depends in large part on the success of its conferences. The members of ALISE's Program Planning Committee are confident that our 2004 Conference will be a big success.

Many individuals and groups submitted paper or panel proposals; unfortunately, we were able to accept only some of the submissions due to time constraints, even though the proposals were of extremely high quality. The number of proposals received is a strong indication of the vitality of the association; thanks to all who submitted these proposals.

We firmly believe that every member of ALISE, every educator in a library and information science program, and everyone interested in the future of education will find many opportunities to learn from, and to share with, colleagues during the conference. We hope your time here in San Diego will be exciting and offer a fruitful meeting of minds.

# 2003 ALISE Town Hall Meeting

Compiled by James Benson from meeting easel notes.

## **Process for Renewal**

- Need vision for future – What kind of organization do we want to be; identity crisis. (O'Connor; Koren; Harris)
- Task force to develop proposal (comprehensive) for what to become and how to do it. (Harris; Barron)
- Need task forces to look at various issues: finances, structure, tasks organization should do. (Durrance)
- Leaders must talk to one another about what we want to do – don't have outsiders to do this. (Friedrich)

## **Domain & Scope**

- This is our time – let's capitalize on it. Open the tent. Think big so we can have big influence. (Eisenberg)
- Need for more intellectual depth (Jablonski; Carlisle; Budd)
- Revise mission to focus on nature of research, teaching, service support. (Belkin; Friedrich)
- Broader information field (Carlisle)
- What are our priorities? (NA)
- Instructional services in libraries (NA)
- We must address unique issues: e.g., faculty shortage, turnover in deans/directors, higher education reauthorization act (implications). (A. O'Neill)
- Acknowledge that our interests go beyond library education. (K. Burnett)
- Do we want this to be LIS or a place where others interested in information can come? (Carlisle)

## **Conference**

- Why does ALISE have to meet with any organizations? (A. O'Neill)
- Get more people here. (O'Connor)
- Importance of recruitment timing. (O'Connor)
- Purpose: meeting or recruiting? (A. O'Neill)
- Timing – classes have begun – why tie to midwinter ALA? A month earlier could be a good recruiting season. (Harris; Friedrich)
- Discounts to schools that send large numbers of faculty. (Eisenberg)
- More substantive research. Make this a research conference. (Belkin)
- Think of ALISE as place to provide workshops, tutorials, etc., to help us be better at what we do. (Belkin)
- "How to interview; teach" workshops. Distance education developers should share expertise. (Woolls)

- Interviews take over – people can't come to sessions. (Woolls)
- Agree we need people to be able to come to sessions. (Jablonski)
- More sessions like this, in which we all talk about what's important to us. (Brown)
- Celebrate what we do, especially research. Education for doctoral students. (Aversa)
- Workshop new deans/chairs (NA)
- Challenge Deans/Directors to encourage faculty to attend. (NA)
- Web-based teaching (share/present workshop) (Woolls)
- No conflict time in conference schedule. (NA)

## **Structure**

- Divisions? Or SIG's. (O'Connor)
- Do away w/SIG's so we can focus on getting ALISE as a whole back on track, then let interest groups emerge. Self-generated interest groups. (Seavey)

## **Publications**

- Journal – for papers not presented. Conference papers on web site rather than in *JELIS*. (Budd)
- Repair web site. (Robbins)
- Newsletter – reports of what's going on in related organizations (A. O'Neill)

## **Membership/Recruitment**

- Look to broader field of adjuncts, etc. (A. O'Neill)
- Get to those who aren't members. Include adjuncts (an untapped market). (Penniman)
- Limit ourselves to just accredited schools? (Koren)
- Bigger is not necessarily better. (K. Burnett)
- Open the tent. (Eisenberg)
- Challenge Deans/Directors to encourage faculty to join. (NA)

## **Members' Responsibilities**

- Think in terms of what we can bring to ALISE. (Budd)

## **Association Management**

- Full-time Executive Director (A. O'Neill; Durrance)

## **Finance & Budget**

- Think big so we can have big influence. If it takes more money, we have to fund it. (Eisenberg)
- Schools should perhaps pay more. (Budd)

## **Cautions**

- Be careful about expecting ALISE to do too much. To do what we'd like to do, need more meetings, etc. (NA)
- Consider: What is it possible for ALISE to do? (Varlejš)

## RESOLUTIONS

Written copies of all resolutions, including resolutions contained in committee reports, must be given to the membership before they are to be presented to that body for action. To permit this, text must be submitted to the Resolutions Committee 24 hours in advance of presentation. A resolution that has fiscal implications must be submitted to the President as well as the Resolutions Committee 24 hours before it is to be voted on so that the Budget Committee can provide information on fiscal implications.

Resolution approved January 13, 1979, limits resolutions to statements on substantive matters relating to library education and the profession of librarianship to be voted on by membership.

## Mission

*The mission of ALISE is to promote excellence in research, teaching, and service for library and information science education.*

## Goals

- Promote an understanding of the values and ethos of library and information science.
- Support the professional and intellectual growth of individual members.
- Advance research that contributes to and enlarges the knowledge base of library and information science and education in the field.
- Provide mechanisms for the exchange, dissemination, and receipt of information about issues, events, trends in such areas as curriculum, research, funding, consulting, continuing education, government, and society as these influence and inform library and information science.
- Strengthen the association's leadership role in library and information science education.

## Key Assumptions

1. Library and information science as a field is growing and maturing. Schools are developing niches and creating new partnerships.
2. Library and information science is grounded in higher education, which is also displaying growing complexity and stress from competing political, social, and economic demands.
3. Long-term societal trends – such as demographic changes, globalization of communication and commerce, technology developments and the inequality of technology access – will continue to shape evolution and change in both higher education and library and information science.
4. ALISE must be economically viable and must be perceived as vital and relevant to the member individuals and institutions.
5. At this time, the major building blocks for achieving the goals of ALISE are an annual conference, a scholarly journal, an annual statistical report and other communication.
6. The activities of ALISE should address critical societal issues related to its mission and should evolve from a strategic planning process.
